La nueva generación de juguetes y juegos de madera de ANDREU TOYS, apuestan por una educación inclusiva y con la clara intención de favorecer y promover la diversidad. Fomentan la diversión durante el juego, el entretenimiento y el aprendizaje para niñ@s que tengan o no, algún tipo de diversidad funcional. Nuestros juguetes educativos, están fabricados con materias primas ecosostenibles y de alta calidad.

Des de 1973 creamos y comercializamos juguetes y juegos educativos de madera, simples, sólidos, seguros, y cuya materia prima proviene de árboles autóctonos, los cuales no contienen tratamiento químico y tienen una larga vida útil.

ANDREU TOYS no solo ofrece juego y diversión, sino que estimulan sensorial y cognitivamente y por su durabilidad se transforman en juguetes para recordar, de esos que se atesoran para siempre.

Todos los artículos cumplen con las estrictas normas de seguridad EN71 de la CEE.

The new generation of Andreu-toys wooden toys and games are committed to an inclusive education with the clear intention on promoting the diversity. They encourage the fun on playing, the entertainment and the learning for children who have or not, some kind of functional diversity. Our educational toys are manufactured with eco-sustainable and high quality raw materials.

Since 1973 we create and commercialize wooden toys & educational games, simple, solid, safe, and whose raw material comes from native trees, which do not contain chemical treatment and have a long useful life.

ANDREU TOYS not only offers play and fun, but they stimulate sensory and cognitively and because of their durability they become toys that keep a memory, of those that are treasured forever.

All items comply with the strict safety standards EN71 of the CEE.

JUGUETES EDUCATIVOS DE MADERA

Wooden Educational Toys

16134

Memo Textures

Sensory memory game. Use the board to place, in the order you prefer, the 9 pieces with different sensory textures. Then, out of the board, flip or face down the other nine pieces with sensory textures that are twins. One of the game proposals is: match the different pieces on the board through the sensory stimulation, without visual reference. Download the instructions by scanning the QR code, to discover more game options.

2+

Instructions

16126

Memo Sensory Puzzle

Pedagogical element to exercise the memory and sensory development. Use the board to place, according to the order you prefer, the 9 pieces with engraved sensory shapes. Then, off the board, flip or face down the other nine engraved pieces. The objective of the game is to match the different pieces with sensorial engravings on the board, using tactile stimulation. Playing without the board: place all the pieces face down, mix them up and by turns and without turning the pieces, touch them one by one until you find a match. Or take turns picking up the piece, visualize it and memorize its position, until you find a match. The classic memory game. From 2 to 99 years old.

2+

Instructions

16137

Textures Sensory Cubes

4 wooden cubes with textures and 12 tactile pieces. Match the cubes with the sensory templates using the tactile perception. Solar System Planetarium

Build your own planetarium. Scale model of the solar system. Paint and decorate the nine planets. Once finished you can simulate the movement of the planets in the solar system. By making the kit by themselves, children will develop an interest in science and technology. Content: plastic base, model of nine planets, metal rods, axis of rotation, abrasive paper, paints and brush. Packaging: 22.7 x 19 x 7.2 cm.

6+

Instructions

N645392

Make Your Own Weather Station

A fun way to learn about the weather. Create your own mini botanical garden with a weather station included and learn about the measurement and direction of the wind, the temperature of the air and the water, the recirculation of rainwater and observe the growth of the plants accordingly. Packaging: 22.7 x 19 x 7.2 cm.

8+

Instructions

N645391

12 in 1 Magnetic Science

Let's play magnetic induction. Do your own experiments and learn about magnetic induction, anti-gravity, balance, the magnetic compass, the magnetized ship and many more. Packaging: 22.7 x 19 x 7.2 cm.

8+

1290393

Newton's Cradle

Instructions

Use the screws and metal connectors to fix the frame of the newton pendulum. Hang the marbles on the plastic rods in order and with equal height. When the first marble hits the second, the energy from the first marble is immediately transmitted to the second and so on until the last marble receives the energy and then shoots out. Contents: plastic plate, plastic rods, marbles, metal rods, screws, wire, metal plates and polyester thread. Packaging: 22.7 x 19 x 4.2 cm.

6+

1290398

Solar Powered Robot

Instructions

Build a wooden robot and paint it with colors. Through the sun's rays, the semiconductor chip converts the sun's thermal energy into electrical current, which rotates the axis and makes the robot move. Replaces storage batteries with solar energy. Content: plywood pieces, solar panel, glue, gears, wheels, electric motor, metal rod, paint, brush, plastic joints, eva foam sheet and moving eyes. Packaging: 22.7 x 19 x 4.2 cm.

7+

1290399

Solar Powered Racing Car

Instructions

Build a wooden car and paint it with colors. Through the sun's rays, the semiconductor chip converts the sun's thermal energy into electric current, which rotates the shaft and makes the car move. Replaces storage batteries with solar energy. Content: plywood pieces, solar panel, glue, gears, wheels, electric motor, metal rod, paint, brush, plastic joints, eva foam sheet and moving eyes. Packaging: 22.7 x 19 x 4.2 cm.

STEAM

1290382

Instructions

Make Your Own Rainbow Lab

Since the density of different solutions is different, please add pigments to distinguish the different density of solutions. Gently inject the different colored liquid pigments into the tube. You will observe the different densities of the solutions. Contents: test tube, pipette, shaker, measuring spoon and colored pigments. Packaging: 22.7 x 19 x 7.2 cm.

6+

1290383

Instructions

Oil & Water Color Pigments

Release droplets of different colored pigments into the oil. Stir to disperse them into small particles. Pour the contents into the water from the large clear plastic jar. Due to the low density of the oil, after several minutes, the small pigment particles will sink and dissolve with the water, then you will see a shower of dreamy colors. Contents: plastic bottle, measuring cup, colored pigments and stirring rod. Attention: this set needs to add oil (not included). Packaging: 22.7 x 19 x 7.2 cm.

6+

1290387

Instructions

A World Undersea

Place the colored balls and the growth rocks in the bottom of the transparent jar. Mix the growth solution with hot water in a certain proportion. Add a few drops of the liquid pigment, into the water. Place decorative stickers and watch the amazing growth process of beautiful water plants. Contents: plastic jar, growing solution, growing rocks, stirring rod, decorative stones, pigment and adhesives. Packaging: 22.7 x 19 x 12.7 cm.

6+

1290394

Magical Bubbles

Use dish soap or liquid hand soap to create magical bubbles. Learn the science of bubble formation. While you are blowing the bubbles outdoors, you can enjoy the fun of science. Contents: plastic jar, measuring cup, glycerin, stirring rod, mixing plate and 6 molds to blow bubbles. Packaging: 22.7 x 19 x 7.2 cm.

6+

Instructions

1290381

Make Your Own Bath Bombs

Mix citric acid powder, soda powder and cornstarch in a certain ratio, add the pigments and fragrance essential oil and other materials into them. Put in the mold to give the shape, then you will have balls of effervescent, aromatic and colorful bath salt. Contents: powdered citric acid, powdered soda, cornstarch, edible pigments, mould, glycerin, essential fragrance oil and pipette. Packaging: 22.7 x 19 x 7.2 cm.

7+

Instructions

1290386

Bath Lab Soap

Melt the soap pieces at a certain temperature, then mix with the colored pigments and essential oil. Pour the contents into molds of various shapes and keep in a cold environment. Afterwards, you will get some pretty soaps of various colors and shapes that smell like perfume. Content: soap, pigments, essential oil, mold and zip-lock bags. Packaging: 25.2 x 25.2 x 7.2 cm.

6+

STEAM

1290392

Instructions

Pipe Cleaner Magic Crystal

Bend and shape the floppy worms into the desired shape. Keep in mind that the pieces must fit in the glass. Crystal powder dissolves in hot water to form a saturated solution. Stir with the transparent stick until completely dissolved. Then let it cool down. Use the wooden toothpicks to hold the object and insert it into the glass with the solution. After 3 hours, the crystalline material will stick to objects. Contents: crystal powder, shaker, flexible worms, toothpicks and glass. Packaging: 22.7 x 19 x 7.2 cm.

6+

1290396

Instructions

Seeds Crystal Growing

Make a mark on the glass 6cm from the base. Add hot water to the mark and add the crystal powder of the desired color to the water, stir the solution. Place the crystal seed of the same color and watch its growth. Please wait 3-7 days and you will get 3 different crystals with different shapes and colors. Contents: plastic cup, crystal powder, crystal seeds and stirring rod. Packaging: 22.7 x 19 x 7.2 cm.

6+

1290397

Instructions

Forms Crystal Growing

Use the gypsum powders to make different crystal shapes. Dissolve the crystal powders in the water and then add the crystal powders. Mix the solution and fill the mold you want. Observe the growth process. After 1-2 days, you will see crystals in different shapes and colors. Content: plastic jar, powdered plaster, edible pigment, powdered crystal, mould, small plastic jar, spoon, pipette, wooden stick and cardboard cone. Packaging: 22.7 x 19 x 7.2 cm.

6+

Instructions

1290389

Create Your Own Volcano Eruption

A bubbling lava eruption. Mix the two kinds of white powder and the pigment in the crater of the mold. Add clean water, then bubbles will start coming out of the crater, just like in a volcano. This is a great science experiment that will wow your friends and family with a bubbling lava eruption. Contents: volcano mold, powdered soda, powdered citric acid, powdered pigment and wooden rod. Packaging: 22.7 x 19 x 7.2 cm.

MD3099

Animals Around The World Puzzle

Circular puzzle of 150 pieces. Animals are in every corner of the world. In cold Antarctica, there are penguins, whales and other animals that can resist the cold and live happily in the snow and ice. Antelopes and zebras like to run across the grassland. Tigers, brown bears, and pythons live in the rainforest. In the ocean, dolphins, seahorses, and turtles swim freely. In this puzzle, children can learn more about the behavior of animals and the different types that inhabit this world. Puzzle size assembled Ø52.8 cm. Packaging: Ø22 x 12.2 cm.

5+

VIKINGTOYS colabora con ONETREEPLANTED.org, una organización sin ánimo de lucro dedicada a la reforestación global del planeta.

Por cada camión Jumbo de la gama ECOLINE vendido, Vikingtoys donará para la plantación de un árbol.

¡¡ Cada JUMBO planta 1 árbol !!

VIKINGTOYS collaborates with ONETREEPLANTED.org, a non-profit organization focused on global planet reforestation.

For each Jumbo truck sold of the ECOLINE range, Vikingtoys will donate a tree.

Join the campaign,

Every JUMBO plants 1 tree !!

Every Jumbo plants a Tree!

We want the kids of tomorrow to be able to play in a clean and beautiful world. Therefore, we now start our project Every Jumbo plants a Tree, together with [One Tree Planted](https://www.onetreeplanted.org/). We believe tree planting is about creating a healthy future for the next generation.

Compra un Jumbo ECOLINE y donarás un árbol

Por cada Jumbo ECOLINE vendido, plantaremos un árbol

ECOLINE

Los juguetes FLEXI TOYS BIO están elaborados con caña de azúcar.

Estos productos combinan un diseño atemporal. Son juguetes duraderos, no tóxicos, fabricados con Bioetileno a base de plantas, en lugar de ser fabricados con aceite proveniente de fuentes fósiles.

FLEXI TOYS BIO made with sugar cane.

These products combines timeless design of durable non-toxic toys with a oil-free plant-based Bioethylene, made with sugar cane instead of polymer.

DISHWASHER SAFE

REDUCIR

Al producir juguetes hechos de Bioetileno (el denominado polietileno verde), reducimos nuestra huella ambiental al aumentar la cantidad de recursos renovables y al utilizar una materia prima libre de fósiles y que absorbe CO₂ de la atmósfera, de forma natural, durante su proceso de fotosíntesis.

REUTILIZAR

Estos juguetes están hechos para durar. Dado que el nuevo material de Bioetileno es tan duradero como el plástico convencional, los juguetes resistirán generaciones de juegos.

RECICLAR

El Bioetileno es 100% reciclable junto con el plástico convencional. Por consiguiente, si alguien, contra todo pronóstico quisiera retirar uno de los juguetes, simplemente puede tirarlo a un contenedor de reciclaje junto al plástico convencional, para que éste sea reciclado y eventualmente se vuelva a convertir en otra cosa.

REDUCE

By producing toys made from Bioethylene (green Polyethylene), we reduce our environmental footprint by increasing the number of renewable resources as well as using a raw material that is fossil free and which absorbs CO₂ from the atmosphere during its natural photosynthesis process.

REUSE

These toys are made to last. Since the new Bioethylene material is just as durable as conventional plastic, the toys will withstand generations of play.

RECYCLE

The Bioethylene is 100% recyclable together with conventional plastic. So if someone against all odds, would like to retire one of the toys, they can just throw it into a recycling bin for plastic to be recycled and eventually remade into something else.

DANTOY es uno de los mayores fabricantes de juguetes de plástico y bio-plásticos en Escandinavia.

Desarrolla productos englobados en las siguientes categorías:
juguetes de playa – de exterior – vehículos – surtidos escolares – juguetes de imitación – juguetes eco-sostenibles – juguetes reciclados.

DANTOY is one of the largest manufacturers of plastic and bio-plastic toys in Scandinavia.

Develop products included in the following categories:
beach toys - outdoor - vehicles - school assortments - imitation toys - eco-sustainable toys - recycling toys.

Dantoy presenta la nueva línea **GREEN BEAN** fabricada con plástico reciclado 100% y con el etiquetado **NORDIC SWAN**.

Dantoy introduces the new line – **GREEN BEAN** – comprising some of our renowned products made exclusively of our own recycled and Nordic Swan Ecolabelled plastic.

Todos los productos son aptos para el lavavajillas.
(Excepto los que llevan adhesivos).

All products are dishwasher safe. (Except those with stickers).

JUGUETES DE IMITACION, MENAJE Y PLAYA

Sand, Water & Roleplay Toys

Dantoy presenta la nueva línea **GREEN BEAN** fabricada con plástico reciclado 100% y con el etiquetado **NORDIC SWAN**. Esta línea comprende algunos de nuestros productos de renombre fabricados exclusivamente con nuestro propio plástico reciclado y de etiquetado Nordic Swan.

Como siempre, en Dantoy pretendemos ser los primeros en avanzar y ser líderes en nuestro sector, esta vez centrados en el objetivo de cumplir con los **12 Objetivos de Desarrollo Sostenible de las Naciones Unidas**, es decir, "Consumo y producción responsables". Al hacerlo, dantoy ayuda a reducir las emisiones de carbono y los volúmenes de desechos del mundo, difundir una comprensión de un estilo de vida sostenible y proteger los recursos del mundo, a medida que continuamos estimulando la creatividad, el desarrollo motor y el aprendizaje social de los niños.

Cada vez que fabricamos algo, generamos un exceso de plástico, que pretendemos usar para crear productos únicos con la misma durabilidad y calidad que todos nuestros otros productos de renombre.

La única diferencia serán las combinaciones de colores, que variarán de un producto a otro. En nuestra opinión, esto beneficia a los consumidores del futuro. La razón por la que podemos optimizar el uso de los recursos de esta manera se debe al diseño de nuestros productos. Pueden estar hechos de diferentes materiales, pero son fáciles de desmontar, lo que nos permite reciclarlos por completo sin tener que descartar nada en el proceso. Vemos esto como una oportunidad única que nosotros, uno de los principales fabricantes de juguetes de Dinamarca, deberíamos aprovechar.

Hemos recibido bastantes consultas sobre si podemos fabricar productos con materias primas recicladas, como los plásticos oceánicos. Desafortunadamente, no podemos hacer esto en nuestro proceso actual, ya que hemos optado por ser Nordic Swan Ecolabelled, y no debemos comprometernos con este nuevo concepto.

Nuestro **Ecoetiquetado Nordic Swan** ayuda a garantizar que conocemos los orígenes del producto del inicio hasta el final del proceso productivo, lo que garantiza que el producto no haya adquirido ningún otro ingrediente durante su proceso de elaboración. Esto nos impide comprar plástico reciclado de fuentes externas, lo que nos permite usar solo los recursos que creamos nosotros mismos. Todavía pensamos que esto es primordial después de todo, ya que fabricamos productos para nuestros preciosos niños que son particularmente vulnerables a las sustancias indeseables en los primeros años de sus vidas.

NORDIC SWAN

In 2020, Dantoy introduces the new line – **GREEN BEAN** – comprising some of our renowned products made exclusively of our own recycled and Nordic Swan Ecolabelled plastic. As always, we at dantoy intend to be first movers and leaders in our sector – this time focused on goal **12 of UN's Sustainable Development Goals**, "Responsible consumption and production". In so doing, dantoy helps reduce the world's carbon emissions and volumes of waste, spread an understanding of a sustainable lifestyle and protect the world's resources – as we continue to stimulate children's creativity, motor development and social learning.

Whenever we manufacture something, we generate excess plastic, which we intend to use to create unique products with the same durability and quality as all our other renowned products.

The only difference will be the colour combinations, which will vary from one product to another. In our view, this benefits the consumers of the future. The reason we can optimise the use of resources in this way is due to the design of our products. They may be made of different materials, but are easy to take apart, which enables us to recycle them completely without having to discard anything in the process. We see this as a unique opportunity that we, one of Denmark's leading toy manufacturers, ought to exploit.

We have received quite a few enquiries about whether we can make products of recycled raw materials, such as ocean plastics. Unfortunately, we are unable to do this in our present process, as we have chosen to be Nordic Swan Ecolabelled, and we must not compromise on this new concept.

Our **Nordic Swan Ecolabelling** helps ensure that we know the product's origins from cradle-to-grave, thus ensuring that the product has not acquired any other ingredients on its product journey. This prevents us from buying recycled plastic from external sources, allowing us to only use the resources we create ourselves. We still think this is paramount after all, as we make products for our precious children who are particularly vulnerable to undesirable substances in the first years of their lives.

Rotating Circus

Two wooden spinning tops to decorate, with the included decorative cardboard or create your own drawings on the blank decorative cardboard. Includes 8 decorated cards and 4 to customize. To play the top wrestling game, spin the 2 tops in the yellow area of the lid, included on the front of the box. The first top to fall loses the game! Packaging: 19.5 x 19.5 x 5.5 cm.

3+

OF

82590

Ciencia del Huevo

Eggs have an excellent shape because they are naturally designed to keep their contents safe. They have a strong curved shape that helps them withstand heavy forces. They are very compact too. Eggs also have an air sac which is there to give oxygen to the baby chicken as it develops. The air sac is usually at the egg's base, or "fat end". This is why eggs when placed in salt water have their narrower ends pointing down because the air sac keeps the base end pointing up.
