La nueva generación de juguetes y juegos de madera de ANDREU TOYS, apuestan por una educación inclusiva y con la clara intención de favorecer y promover la diversidad. Fomentan la diversión durante el juego, el entretenimiento y el aprendizaje para niñ@s que tengan o no, algún tipo de diversidad funcional. Nuestros juguetes educativos, están fabricados con materias primas ecosostenibles y de alta calidad.

Des de 1973 creamos y comercializamos juguetes y juegos educativos de madera, simples, sólidos, seguros, y cuya materia prima proviene de árboles autóctonos, los cuales no contienen tratamiento químico y tienen una larga vida útil.

ANDREU TOYS no solo ofrece juego y diversión, sino que estimulan sensorial y cognitivamente y por su durabilidad se transforman en juguetes para recordar, de esos que se atesoran para siempre.

Todos los artículos cumplen con las estrictas normas de seguridad EN71 de la CEE.

The new generation of Andreu-toys wooden toys and games are committed to an Inclusive education with the clear intention on promoting the diversity. They encourage the fun on playing, the entertainment and the learning for children who have or not, some kind of functional diversity. Our educational toys are manufactured with eco-sustainable and high quality raw materials.

Since 1973 we create and commercialize wooden toys & educational games, simple, solid, safe, and whose raw material comes from native trees, which do not contain chemical treatment and have a long useful life.

ANDREU TOYS not only offers play and fun, but they stimulate sensory and cognitively and because of their durability they become toys that keep a memory, of those that are treasured forever.

All items comply with the strict safety standards EN71 of the CEE.

Let's play magnetic induction. Do your own experiments and learn about magnetic induction, anti-gravity, balance, magnetic compass, boat magnet and many more. Packaging: 22,7 x 19 x 7,2 cm.

8+

1290393

Newton's Cradle

Instructions

Use the screws and metal connectors to attach the frame of the newton pendulum. Hang the marbles on the plastic rods in order and with the same height. When the first marble hits the second, the energy from the first marble is immediately transmitted to the second and so on until the last marble receives the energy and then pos out. Content: plastic plate, plastic rods, marbles, metal rods, screws, wire, metal plates and polyester thread. Packaging: 22,7 x 19 x 4,2 cm.

6+

1290398

Solar Powered Robot

Instructions

Build a wooden robot and paint it with colors. With the rays of the sun, the semiconductor chip converts the thermal energy of the sun into electric energy, which rotates the shaft and makes the robot to move. Replace the storage batteries by green solar energy. Content: plywood pieces, solar panel, glue, gears, wheels, electric motor, metal rod, paint, brush, plastic joints, eva foam sheet and wiggly eyes. Packaging: 22,7 x 19 x 4,2 cm.

7+

1290399

Solar Powered Racing Car

Instructions

Build a wooden car and paint it with colors. Through the rays of the sun, the semiconductor chip converts the thermal energy of the sun into electric energy, which rotates the axle and makes the car to move. Replace the storage batteries by green solar energy. Content: plywood pieces, solar panel, glue, gears, wheels, electric motor, metal rod, paint, brush, plastic joints, eva foam sheet and moving eyes. Packaging: 22,7 x 19 x 4,2 cm.

7+

STEAM

1290382

Instructions

Make Your Own Rainbow Lab

As the density of the different solutions is different, add pigments to distinguish the different density of the solutions. Slowly inject the different colored liquid pigments into the tube. You will observe the different densities of the solutions. Contents: test tube, pipette, rod, measuring spoon and colored pigments.

Packaging: 22,7 x 19 x 7,2 cm.

6+

1290383

Instructions

Oil & Water Color Pigments

Drop different color pigments into the oil. Remove to disperse them into small particles. Then drop the content into the water in the large clear plastic jar. Due to the low density of the oil, after several minutes, the small pigment particles will sink and dissolve with the water, then you will see a rain of dream colors. Content: plastic bottle, measuring cup, colored pigments and removal rod. Attention: this set needs to add oil (not included). Packaging: 22,7 x 19 x 7,2 cm.

6+

1290387

Instructions

A World Undersea

Place the colored balls and the growing rocks in the base of the clear jar. Mix the growing solution with hot water in a certain proportion. Add some drops of the liquid pigment into the water. Apply decorative stickers and watch the incredible growing process of some beautiful water plants. Content: plastic jar, growing solution, growing rocks, remover rod, decorative stones, pigment and adhesives. Packaging: 22,7 x 19 x 12,7 cm.

6+

1290394

Magical Bubbles

Instructions

Use dishwasher detergent or liquid hand soap to create magic bubbles. Learn the science of bubble formation. While blowing the bubbles outdoors, you can enjoy the fun of science. Content: plastic jar, measuring cup, glycerin, rod, mixing plate and 6 molds for blowing bubbles. Packaging: 22,7 x 19 x 7,2 cm.

6+

1290381

Make Your Own Bath Bombs

Instructions

Mix the citric acid powder, soda powder and cornstarch in a specific proportion, add the pigments and the essential fragrance oil and other materials in them. Put in the mould to give the shape, then you will have effervescent, aromatic and colorful balls of bath salt. Content: citric acid powder, powdered soda, cornstarch, edible pigments, mold, glycerin, essential fragrance oil and pipette. Packaging: 22,7 x 19 x 7,2 cm.

7+

1290386

Bath Lab Soap

Instructions

Melt the soap pieces to a certain temperature, then mix with the colored pigments and essential oil. Put the content into molds of various forms and keep in a cold environment. Then, you will get some the nicest soaps of various colors and shapes that smell of perfume. Content: soap, pigments, essential oil, mold and zip bags. Packaging: 25,2 x 25,2 x 7,2 cm.

TRICICLOS Y PATINETES RESISTENTES

Heavy Duty Trikes & Scooters

Se ha mejorado la capacidad de resistencia mediante la aplicación del polímero PP/TPU en la banda de rozamiento de las ruedas!

The resistance capacity has been improved by the application of PP/TPU polymer in the tread of the wheels!

Algunos beneficios del poliuretano termoplástico:

- Es muy duradero, resistente a los impactos y no se agrieta ni se fractura.
- Es resistente al calor y, por lo tanto, fácil de moldear, lo que lo hace ideal para una variedad de aplicaciones.
- Es fácilmente reciclable, lo que significa que también es bueno para el medio ambiente.

Some benefits of thermoplastic polyurethane:

- It is highly durable, impact resistant and will not crack or fracture.
- It is heat resistant and therefore easy to mold, making it ideal for a variety of applications.
- It is easily recyclable, which means it is also good for the environment.

VIKING HEARTS

BY VIKINGTOYS®
ECOLINE

Los juguetes VIKING HEARTS están elaborados con caña de azúcar.

Estos productos combinan un diseño atemporal. Son juguetes duraderos, no tóxicos, fabricados con Bioetileno a base de plantas, en lugar de ser fabricados con aceite proveniente de fuentes fósiles.

VIKING HEARTS made with sugar cane.

These products combines timeless design of durable non-toxic toys with a oil-free plant-based Bioethylene, made with sugar cane instead of polymer.

La caña de azúcar crece y actúa como filtro de aire.

Sugar cane grows and act as air cleaner.

Los juguetes son totalmente reciclables junto con el plástico convencional.

The toys are fully recyclable together with conventional plastic.

Se recolecta la caña de azúcar y se convierte en Etanol.

Sugar cane is harvested and turned into Ethanol.

El Etanol sustituye al aceite de fuentes fósiles en la producción de plásticos y se elabora el Bioetileno.

The Ethanol replace oil in the plastic production and Bioethylene is made.

El Bioetileno está elaborado para producir juguetes seguros.

Bioethylene is made to produce safe toys.

Dishwasher safe.
Apto para el lavavajillas.

RE:LINE

MADE FROM RECYCLED PLASTICS

NUEVO

¿DE QUÉ ESTÁ HECHO LA RELINE?

La RE:LINE esta hecha con plástico reciclado. Algunos modelos contienen resina PP dura reciclada y otros resina PP blanda reciclada, dependiendo de las cualidades que se deseen respecto a cada juguete, ya que estos sólo tienen una clase de plástico en cada tipo de juguete, con el fin de facilitar su reciclaje posterior.

¿EN QUÉ CONSISTE EL PROCESO?

RE:LINE utiliza residuos plásticos para evitar que estos acaben en vertederos o en nuestros océanos. El material reciclado procede de las instalaciones de reciclaje del Norte de Vietnam. Los plásticos usados se clasifican, se limpian y se trituran en copos. Estos copos son la materia prima utilizada en la fabricación de juguetes y se emplean en nuestra fábrica del Sur de Vietnam para producir los juguetes con el mismo alto nivel de calidad que el resto de nuestros productos.

CERTIFICACIÓN RCS

RE:LINE cuenta con la certificación Recycled Claim Standard (RCS), la cual es una norma internacional voluntaria que establece requisitos para terceros. Se trata de un control respecto a la cadena de custodia para hacer un seguimiento de las materias primas recicladas a lo largo del proceso de suministro. Tanto nuestro proveedor de material reciclado así como nuestra fábrica tienen la certificación correspondiente.

WHAT IS RELINE MADE OF?

RE:LINE is made from recycled plastics. Some in recycled hard PP and some in recycled soft PP, depending on the quality of each toy is desired on to have. The toy only have one type of plastic in the entire toy. This to make it fully recyclable afterwards.

WHAT IS THE PROCESS?

RE:LINE uses plastic waste to prevent it from ending up in landfills or in our oceans. The recycled material comes from the recycling facility in the northern Vietnam. Used plastics are sorted, cleaned and shredded into flakes. These flakes are the raw material for the toys. This is then used in our factory in Southern Vietnam to produce the toys to the same high standards and quality as all our product range.

RCS CERTIFICATION

RE:LINE has been certified with the Recycled Claim Standard (RCS) which is an international, voluntary standard that sets requirements for third-party. It is a chain of custody standard to track recycled raw materials through the supply chain. Both our supplier of recycled material and our manufacturing factory have the certification.

DANTOY es uno de los mayores fabricantes de juguetes de plástico y bio-plásticos en Escandinavia.

Desarrolla productos englobados en las siguientes categorías:
juguetes de playa – **de exterior** – **vehículos** – **surtidos escolares**
 – **juguetes de imitación** – **juguetes eco-sostenibles** - **juguetes reciclados**.

DANTOY is one of the largest manufacturers of plastic and bio-plastic toys in Scandinavia.

Develop products included in the following categories:
beach toys - **outdoor** - **vehicles** - **school assortments** - **imitation toys** - **eco-sustainable toys** - **recycling toys**.

Todos los productos son aptos para el lavavajillas.
 (Excepto los que llevan adhesivos).

All products are dishwasher safe. (Except those with stickers).

**JUGUETES DE IMITACION,
 MENAJE Y PLAYA**

Sand, Water & Roleplay Toys

Dantoy presenta la nueva línea **GREEN BEAN** fabricada con plástico reciclado 100% y con el etiquetado **NORDIC SWAN**. Esta línea comprende algunos de nuestros productos de renombre fabricados exclusivamente con nuestro propio plástico reciclado y de etiquetado Nordic Swan.

Como siempre, en Dantoy pretendemos ser los primeros en avanzar y ser líderes en nuestro sector, esta vez centrados en el objetivo de cumplir con los **12 Objetivos de Desarrollo Sostenible de las Naciones Unidas**, es decir, "Consumo y producción responsables". Al hacerlo, dantoy ayuda a reducir las emisiones de carbono y los volúmenes de desechos del mundo, difundir una comprensión de un estilo de vida sostenible y proteger los recursos del mundo, a medida que continuamos estimulando la creatividad, el desarrollo motor y el aprendizaje social de los niños.

Cada vez que fabricamos algo, generamos un exceso de plástico, que pretendemos usar para crear productos únicos con la misma durabilidad y calidad que todos nuestros otros productos de renombre.

La única diferencia serán las combinaciones de colores, que variarán de un producto a otro. En nuestra opinión, esto beneficia a los consumidores del futuro. La razón por la que podemos optimizar el uso de los recursos de esta manera se debe al diseño de nuestros productos. Pueden estar hechos de diferentes materiales, pero son fáciles de desmontar, lo que nos permite reciclarlos por completo sin tener que descartar nada en el proceso. Vemos esto como una oportunidad única que nosotros, uno de los principales fabricantes de juguetes de Dinamarca, deberíamos aprovechar.

Hemos recibido bastantes consultas sobre si podemos fabricar productos con materias primas recicladas, como los plásticos oceánicos. Desafortunadamente, no podemos hacer esto en nuestro proceso actual, ya que hemos optado por ser Nordic Swan Ecolabelled, y no debemos comprometernos con este nuevo concepto.

Nuestro Ecoetiquetado Nordic Swan ayuda a garantizar que conocemos los orígenes del producto del inicio hasta el final del proceso productivo, lo que garantiza que el producto no haya adquirido ningún otro ingrediente durante su proceso de elaboración. Esto nos impide comprar plástico reciclado de fuentes externas, lo que nos permite usar solo los recursos que creamos nosotros mismos. Todavía pensamos que esto es primordial después de todo, ya que fabricamos productos para nuestros preciosos niños que son particularmente vulnerables a las sustancias indeseables en los primeros años de sus vidas.

LA APARICIÓN DE MANCHAS O AGUAS DE DIFERENTES COLORES EN ALGUNAS DE LAS PIEZAS, ES UN PROCESO NORMAL Y QUE OCURRE CON FRECUENCIA, YA QUE SE TRATA DE PLÁSTICO RECICLADO.

THE APPEARANCE OF STAINS OR WATER MARKS WITH DIFFERENT COLORS, IN SOME OF THE PIECES, IT IS A NORMAL PROCESS THAT OCCURS FREQUENTLY SINCE IT IS MADE OF RECYCLED PLASTIC.

NORDIC SWAN

In 2020, Dantoy introduces the new line – **GREEN BEAN** – comprising some of our renowned products made exclusively of our own recycled and Nordic Swan Ecolabelled plastic. As always, we at dantoy intend to be first movers and leaders in our sector – this time focused on goal **12 of UN's Sustainable Development Goals**, "Responsible consumption and production". In so doing, dantoy helps reduce the world's carbon emissions and volumes of waste, spread an understanding of a sustainable lifestyle and protect the world's resources – as we continue to stimulate children's creativity, motor development and social learning.

Whenever we manufacture something, we generate excess plastic, which we intend to use to create unique products with the same durability and quality as all our other renowned products.

The only difference will be the colour combinations, which will vary from one product to another. In our view, this benefits the consumers of the future. The reason we can optimise the use of resources in this way is due to the design of our products. They may be made of different materials, but are easy to take apart, which enables us to recycle them completely without having to discard anything in the process. We see this as a unique opportunity that we, one of Denmark's leading toy manufacturers, ought to exploit.

We have received quite a few enquiries about whether we can make products of recycled raw materials, such as ocean plastics. Unfortunately, we are unable to do this in our present process, as we have chosen to be Nordic Swan Ecolabelled, and we must not compromise on this new concept.

Our **Nordic Swan Ecolabelling** helps ensure that we know the product's origins from cradle-to-grave, thus ensuring that the product has not acquired any other ingredients on its product journey. This prevents us from buying recycled plastic from external sources, allowing us to only use the resources we create ourselves. We still think this is paramount after all, as we make products for our precious children who are particularly vulnerable to undesirable substances in the first years of their lives.
